

FIREWIPES[®]

YOUR FIRST LINE OF DEFENSE IN DECON

FREQUENTLY ASKED QUESTIONS

Frequently Asked Questions

What is a Firewipe[®]? - The Firewipe is a textured, industrial strength disposable wipe infused with specialized compounds that cleanse the skin.

Does a Firewipe prevent cancer? - No, a Firewipe is used to cleanse the skin of hazardous fireground contaminants and minimize exposure time to potential carcinogens.

How large is a single Firewipe? - The Firewipe is 8" x 12" in size.

Where can I use the Firewipe? - The Firewipe can be used on all external dermal areas.

What is the shelf life of a Firewipe? - The Firewipe is most effective when used by or before the 3-year mark from the date of manufacture. The date is clearly labeled on the 12-count box.

Where to store the Firewipe? - It is best to store them in a cool and dry environment. However, with their triple film packaging, they are durable enough to keep in most normal storage areas.

Is the Firewipe scented? - The Firewipe is non-scented, which means there is no added scent to the formula.

Can I flush a Firewipe? - In a pinch, a Firewipe can be used on all external dermal areas. But due to the hydro-entangled design of the wipe, they are not flushable and should not be discarded in a Porta-Potty.
